# Copper water bottles

A recent report showed that the top supermarkets in the UK sold 2.5 BILLION disposable water bottles last year – 37 for each member of the population. What a waste! They're the most common form of litter on our coastline, and even if we recycle them it doesn't guarantee that they won't end up in our oceans, a major pollutant and a hazard to wildlife.

In the sea, they break down into micro-plastics, containing toxins (which are used in many plastics, to increase their durability) and absorbing pollutants from the sea. Eaten by fish, they affect the food chain and eventually ourselves.

What can we do? It's up to us! Bottled water tastes no different from tap water and its benefits, if any exist, have been massively exaggerated by companies to boost their sales. We're being taken for a ride!

**Bestselling range!**

These copper water bottles are a great alternative, which can be used again and again!

Copper is known to bring you healthier lifestyle benefits for mind and body. Highly recommended by experts, copper turns water into a natural alkaline, which helps balance your body's pH levels.

To get the maximum health benefits, let your water sit overnight in the bottle and drink it in the morning for a healthy dose of copper nutrients necessary for a better life and mood. We like to call it the copper detox!

- Benefits are:
- very high quality
  - fair trade
  - 99.7% pure copper
  - sustainable material
  - leakproof
  - self-sterilizing
  - healing properties
  - handcrafted
  - appealing to look at!!

**NA2215**  
steel lunch box  
15x10.5x12cm ht

Two zero waste, high quality stainless steel lunch boxes from India. A great alternative to throw-away plastic lunches – use them again and again. Can also be used for storage.

# Recycled Glassware

Crisil is our first supplier from Bolivia. Our first container of this high quality glassware almost sold out as soon as it arrived. A small, family-run business, Crisil provides an income for over 500 families, although unfortunately they've been hit hard by Covid. It's a great, eco product, made from 100% recycled glass. The glass is broken up, washed and melted before being mouth-blown and shaped into glasses, jugs and other products. All products are made to a very high standard and are dishwasher safe.

## Cheers!

## rice husk cup

Did you know...

An estimated 8 million tons of plastic ends up in the oceans every year!

Disposable coffee cups, though made largely of paper, contain plastic polyethylene to make them waterproof. Technically, they are recyclable however only 3 specialist centres in the UK can do this and with only 9% of plastic ever getting recycled - almost all end up in landfill or worse, the sea.

So, it's up to us!  
Our coffee cups are made from rice husks, contain no melamine and are fully biodegradable. They are dishwasher and microwave safe, and (unlike the bamboo cups we tested ourselves), don't stain. Look after them, and they will last for years.

# Recycle it!

Our producers in India have found an innovative way to recycle and find creative ways to use bike chain. Coasters, trivets, bottle openers and wine racks... there are so many different items that can be made out of this material. They're unusual and a fantastic gift, and excellent sellers.
